

## Pedestal Mounting Procedure

1. Screw the pedestal to the base mount.
2. Position the pedestal mount so the holes in the mounting plate are facing the direction you want the BBQ to sit.

3. Fasten the base to the floor using 1/4" Stainless Steel fasteners. (not included)
4. Place the BBQ on the mounting plate and align the holes with the center hole pattern on the bottom of the BBQ.

5. Secure BBQ to the mounting plate using the thumb screws provided. The thumb screw requires the use of a fender washer and a lock washer (included). The fender washer goes on the thumb screw first followed by the lock washer. Tighten both thumb screws securely.

6. To remove the Pedestal, remove the BBQ from the mounting plate, push down on the lock button on the pedestal base, and unscrew the Pedestal.
