Base Station & Wireless Controller Installation guide

Fitting Base Station

1. Remove cover

3. Drill two ⁷/₆₄ inch (2.7 mm) pilot holes for the fixing screws

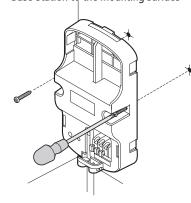

4. Countersink the pilot holes to prevent damage to the mounting surface

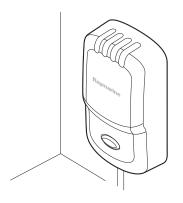

2. Mark holes for the fixing screws.

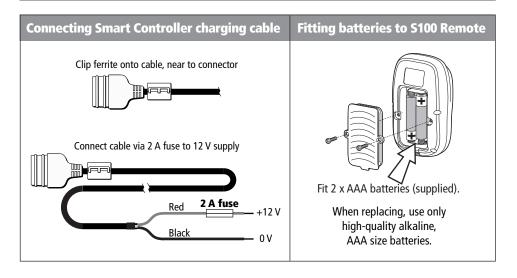

5. Use the two No. 6 screws to secure the Base Station to the mounting surface

6. Replace cover

Connecting Base Station Important: Before connecting the Base Station, ensure that the 12 V supply on the associated SeaTalk system is protected by a 5 A fuse. SeaTalk bus **Base Station** For example, connect to an unused SeaTalk connector on an instrument Connect to Raymarine SeaTalk bus Or use the SeaTalk connector block supplied to connect to a SeaTalk bus Connector block If necessary, you can remove the SeaTalk connector from the Base Station cable, to make direct connections to SeaTalk, e.g. at a Raymarine course computer. **SeaTalk color coding:**

Yellow : SeaTalk data Red: +12 V Screen: 0 V
